

ULTIMATE PROTECTION UV+ *for Accoya®*

HYDRO-OILS SOLUTIONS

RENNER
WOOD COATINGS

The perfect combination between chemistry and nature

Ultimate Protection^{UV+}

Renner Italia hydro-oils for exterior are long-lasting solutions for the protection of outdoor woodworks. These water-based formulas are created to ward off the attacks from the most dangerous atmospheric and biological agents, thus revolutionizing the concepts of care and maintenance.

In fact, sanding is no longer necessary thanks to the Self-consuming formula of Ultimate Protection^{UV+}. These smart solutions boost the already high chemical and mechanical resistances of Accoya[®] wood.

In addition to the improved longevity and excellent dimensional stability.

Renner Italia hydro-oils make the wood:

- resistant to water and salty sea mist
- an incredible shield against solar radiation, fungi, molds and bacteria
- resistant to abrasion and foot traffic

Accoya[®]

Accoya[®] is a solid radiata pine wood from sustainable fast-growing forests which provides excellent dimensional stability and durability performances even superior to the best tropical hardwoods.

Accoya[®] derives from extensive research concerning the acetylation process. The improvement of this chemical process has led to the reduction of water absorption by the wood, implementing dimensional stability and excellent durability.

Accoya[®] cannot be attacked by enzymes, becoming a super wood suitable for several woodworks such as window frames, furniture, claddings, doors, shutters, deckings.

Accoya[®] is a high-performance sustainable building material.

**Choosing Accoya[®] treated with Ultimate Protection^{UV+}
is the best solution for the creation of your woodwork outdoors.**

Ultimate coating systems for your Accoya® outdoors

ACCOYA® RESISTANT

COAT	WATER-BASED PROTECTIVE SYSTEM	APPLICATION
1	YS C110 - COLOURED	Brush / Dipping / Flow-coating/ Spray brush
2	YS C110 - COLOURED	Brush / Dipping / Flow-coating/ Spray brush
3	YS C110 - COLOURED	Brush / Dipping / Flow-coating/ Spray brush

ACCOYA® DURABILITY PLUS

COAT	WATER-BASED PROTECTIVE SYSTEM	APPLICATION
1	YS C100/--NTR - COLOURED	Brush / Dipping / Flow-coating/ Spray brush
2	YS C100/--NTR - COLOURED	Brush / Dipping / Flow-coating/ Spray brush
3	YS M303 (YS M305, YS M307, YS M339) - COLOURED (option: add 5% of YC M402 hardener)	Brush / Spray gun

CLEANING

1. Apply T.Clean RR1050 Detergent by microfiber cloth
2. Let it dry off

MAINTENANCE

3. Apply T.Clean RR1050 Detergent by microfiber cloth
4. Let it dry off
5. Apply 1-2 coats by brush of the already applied hydro-oil

A colored coating process is always suggested to obtain the best durability.
